Professional Summary

Computer Science graduate (B.Tech., 2025) with hands-on project experience in data analysis, SQL, Python, Power BI, and statistical analysis. Skilled in data cleaning, validation, exploratory data analysis, dashboard development, and translating findings into actionable insights. Applied SQL, Python, SQLite, Power Query, DAX, and machine learning techniques across customer churn, workforce attrition, and restaurant performance analytics projects. Seeking an entry-level Data Analyst, BI Analyst, Reporting Analyst, or related analytics role.

Technical Skills

Programming & Data Analysis: Python, SQL, Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning, Data Validation, Data Quality
Databases: MySQL, PostgreSQL, SQLite
Business Intelligence & Visualization: Power BI, DAX, Power Query, Dashboard Development, Data Visualization, Reporting
Statistics & Machine Learning: Statistical Analysis, Correlation Analysis, Predictive Modeling, Scikit-learn, Random Forest, A/B Testing
Business & Reporting: Business Analysis, Data Storytelling, KPI Analysis, Process Improvement

Projects

Telecom Customer Churn Analysis

Python, SQL, Scikit-learn, Power BI | GitHub Repository

- Cleaned, validated, and analyzed 7,043 customer records, identifying an overall churn rate of 26.5% and higher-churn segments, including month-to-month customers (43%) and customers with less than 12 months of tenure.
- Developed a Random Forest classification model achieving 85.3% accuracy and 82.1% precision to identify customers at higher risk of churn and support retention analysis.
- Built an interactive Power BI dashboard to explore churn patterns, compare customer segments, and communicate findings for data-informed retention decisions.

Workforce Attrition & Retention Analytics

Power BI, DAX, Power Query | GitHub Repository

- Processed and validated 1,470 employee records using Power Query, identifying an overall employee attrition rate of 16.12% and patterns across workforce segments.
- Developed a five-page interactive Power BI dashboard with DAX measures and Key Influencers analysis to examine factors associated with attrition, including overtime and income-related segments.
- Identified an attrition rate of 35.77% among employees under age 25, highlighting early-career retention as an area for further investigation and workforce planning.

Yelp Restaurant Success Metrics Analysis

Python, SQL, SQLite, Statistical Analysis | GitHub Repository

- Queried and analyzed 150,000+ restaurant records and 2 million+ reviews using SQL, Python, and SQLite to examine restaurant performance, review patterns, and engagement metrics.
- Applied correlation analysis and geographic segmentation, identifying an approximately 2.5x engagement gap between higher-rated and lower-rated restaurants; Elite users, representing 4.5% of the user base, contributed 44% of reviews.
- Summarized analytical findings into data-backed recommendations for evaluating restaurant performance, customer engagement, and market opportunities.

Education

Bachelor of Technology (B.Tech.) in Computer Science and Engineering
Shivajirao Kadam Institute of Technology & Management, Indore (RGPV)
July 2021 – May 2025

Certifications & Additional Training

- **SQL (Advanced), 5-star** – HackerRank | Certificate
- **Python, 3-star** – HackerRank | Profile
- **Python for Data Science (PY0101EN)** – IBM, Cognitive Class | Certificate
- **Prepare and Visualize Data with Power BI** – Microsoft Learn | Learning Path
- **Data Science Job Simulation** – BCG, Forage | Certificate
- **Data Analytics Job Simulation** – Deloitte, Forage | Certificate
